

ICIDS Spare Parts

RECOMMENDED HARDWARE

As a key equipment supplier to the ICIDS program, DAQ would like to establish a point of contact for assistance with your StarWatch system. Our team of technicians and DAQ-certified value-added resellers is able to provide extensive support for configuration, maintenance, expansion/upgrade options, training, and troubleshooting.

To ensure that our on-base users optimize the operation and uptime of their StarWatch systems, we recommend stocking a sufficient supply of spare units/components. The following charts list the ICIDS products available for order, including master station related units and field equipment.

PRIMARY MONITORING CONSOLE (PMC)

PART #	DESCRIPTION
ACB-08123	PMC Master Comm, RS-232, $\pm 3V$ to $\pm 12V$, MCU to Poller MUX Bin
ACB-04704-0	Audio Poller MUX, 8 Channels
ACB-05022-1	DX Audio MUX Term, 8 channels, used with Audio Poller MUX
ACB-05028-0	LIU-8 Line Isolation, used with Audio Poller MUX
ACB-05076-0	DX-232 Termination Basic, used with Digital Poller MUX
APS-08140	PMC Power Supply Panel, rack-mount, with switch and fuse
H35-09818	SEL-3025 Serial Shield Unit - DES (requires PS-09562 PSU)
PS-09562	SEL-3025 PSU, 90-264VAC to 15VDC @ 2A, stripped wires

Depending on the specific model, DAQ recommends maintaining a 10 - 20% stock of spare units on-site. For example, a base with 10 Audio Poller MUX channels should keep an additional 2 each of ACB-04704-0, ACB-05022-1, and ACB-05028-0 on hand for direct replacement or for use during equipment maintenance.
